## **DETAILED ACTION**

### **Request for Continued Examination (RCE)**

The RCE filed on November 7, 2008 has been processed. A non-final follows.

### ***Claim Objections***

Claim 22 is objected to, because it depends on canceled claim 21.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20, 22, and 50-51 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-20 are directed to a single point of sale device. The system should include more than one limitation directed to hardware to carry out the functions.

Claims 22 and 50-51 are directed to a storage medium. The storage medium should be a tangible medium.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 23-47 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Art Unit: 3691

Claim 23-29 are directed to a convenience card with no computer hardware to carry out the instructions embedded within the card.

Claims 30-47 recite a method. Based on Supreme Court precedent, a proper process must be tied to another statutory class or transform underlying subject matter to a different state or thing (*Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780, 787-88 (1876)). Since neither of these requirements is met by the claim, the method is not considered a patent eligible process under 35 U.S.C. 101. To qualify as a statutory process, the claim should positively recite the other statutory class to which it is tied, for example by identifying the apparatus that accomplished the method steps or positively reciting the subject matter that is being transformed, for example by identifying the material that is being changed to a different state.

The rejection of claims 1-20, 22, and 48 has been withdrawn.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

Art Unit: 3691

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-20 and 22-51 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sosa (2002/0099607) in view of Walker (6,690,779) and Liebermann (7,287,009).

Sosa discloses and Walker teaches the invention as claimed, as set forth in the previous Office Action mailed on September 6, 2006. Sosa further discloses an automatic population option that fills in saved information (para.62) and visually displaying transaction information (para.70). However, Sosa does not disclose return to the point of sale device stored transaction information identifying prior money transfer recipients of the customer for use by the point of sale device. Liebermann teaches a method and corresponding system for carrying out business transactions comprising identifying historical transaction information pertaining to money transfer recipients of the customer (co1.11, line 55 to co1.12, line and co1.15, line 59 to co1.17, line 35). It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate the teachings of Walker and Liebermann within Sosa for the motivation of allowing for more convenience in transferring funds and tracking customers.

### ***Response to Arguments***

Applicant's arguments filed November 7, 2008 have been fully considered but they are not persuasive. The Applicant argues that the references do not disclose or

Art Unit: 3691

teach a "return to the point of sale device stored transaction information identifying prior money transfer recipients of the customer for use by the point of sale device to automatically prepare a transaction form associated with the request to process the money transfer transaction." In response, Sosa discloses that the" USER2 519 may cut and paste the valid charge information 617 from the cash account system 107 into the merchant purchase page or may select an automatic population option offered by the cash account system 107 that automatically fills the valid charge information 617 into the purchase page upon indication by USER2 519. (para.62)." The automatic population featured may be used to populate forms with saved information.

Liebermann teaches identifying historical information pertaining to money transfer recipients. The Examiner is interpreting the automatic population feature of Sosa as being capable of automatically populating any type of information into the form, including historical information of money transfer recipients.
